

# PARTNER WITH US

Contact us today to set up a contract. With a contract in place, there is no obligation to use our service but we will be available 24/7: nights, weekends, holidays & blizzards to help you in your time of need.

## About Us

Interstate Medical Transport is a faith based company established in January of 2024 to meet the growing need for interfacility transportation in Montana, often across state lines. We emphasize a professional and compassionate environment.

# Our Staff

Interstate Medical is rapidly growing. Our team is continually educating themselves. EMRs are training to be EMTs, EMTs are studying to become paramedics, and paramedics are working on earning their critical care certification.

## What We Offer

Interstate Medical Transport makes long distance trips as safe and comfortable for our patients as possible. Our ambulances are equipped with liquid ride suspension to minimize rough roads. Our stretcher mattresses have been replaced with custom built memory foam mattresses. T.V.s are available for our patients to watch their favorite movies during the long trip. All staff receive extensive driver's training including the completion of a EVOC course as well as completing the Montana Drive program. If ALS services are required, our paramedics are either critical care certified or working on their certification. We carry a full compliment of ALS medications to meet the needs of our patients.

**Call Today! 406-740-2646**

## Bariatric Transport

We offer bariatric services that include a bariatric stretcher and additional personnel to provide a safe & comfortable trip.

## Therapy Dog

Yarin, our certified therapy dog, is available for mental health transfers on request.
